ENVIRONMENTAL & SUSTAINABILITY POLICY

BRD Group is a multi-award-winning Building and Interior Design practice committed to providing the highest quality service.

Our company is led by our company Directors and supported by our accomplished team of Building and Interior Designers.

It is the policy of the Practice to “Work in a socially conscious manner concerning the impact of its work with the natural environment and the existing built environment.”

Throughout our design activities, the Practice will:

- Design to provide a healthy internal environment with appropriate daylight and fresh air requirements.
- Design to reduce vehicle movements and optimise usage of public transport.
- Design features to encourage cycle usage and walking.
- Design to make use of materials with low embodied energy to minimise waste and pollution whilst taking into consideration deconstruction, recycling and promote brownfield sites.
- Design to reduce usage of treated water and take into consideration rainwater/grey water/black water recycling.
- Design to reduce consumption of energy within buildings operation and utilise appropriate control and management systems and take into consideration on-site reusable energy systems.
- Design to lessen the effect of development on the natural environment, including protection of ground water and natural water courses.

ENVIRONMENTAL & SUSTAINABILITY POLICY

Throughout our workplace/business activities, the Practice will:

- Encourage efficient use of energy, resources, supplies, equipment, and products, especially those that are non-renewable.
- Maintain environmental awareness with our staff, offer suitable environmental training, and inspire them to work with a responsible and environmentally friendly approach.
- Avoid use of hazardous materials and products and take every possible care when hazardous materials must be utilised. Hazardous materials will be stored and disposed of with a proactive approach in pursuing methods that prevent avoidable pollution.
- Where viable, reduce waste through recycling or re-use of office supplies and equipment.
- Make sure there is compliance with or enhancement upon applicable environmental legislation requirements.
- Consider energy efficiency when procuring new equipment and use environmentally friendly products accordingly.
