

OAK & VINE

HOSPITALITY DESIGN

LOCATION Melbourne CBD, VIC
 YEAR 2015

Oak & Vine is an innovative concept to inner city bar/restaurant design.

The tenancy has been transformed from a pokey bar into a vibrant 'place to be' with innovative use of timber, vibrant colours and design elements used to create a sensational socialising experience.

Existing street glazing within the space consisted of large sliding panels which were the inspiration behind creating a 'wintergarden' deck dining experience.

Extensive use of timber, greenery and variable windows allows for a casual, flexible patron area with the space also providing the transition between the street pedestrians and the internal bar.

Internally, the fit-out provides a signature bar that incorporates stone, timber, and metal which is emphasised through the use of specialty lighting.

Operable bi-fold doors allow the merge of the dining and guest waiting areas, thus creating separate spaces with visual connections.
