

LOCATION Buderim, Queensland
YEAR 2014

The completed renovations and additions to the North Buderim Marketplace have provided a much needed lift to an old and tired neighbourhood shopping destination. The new centre incorporates a large scale neighbourhood supermarket, revised speciality shops, and improved car parking.

A significant increase in leasable floor area, revised site entry, and a major increase in car parking was achieved. Service vehicle movements were improved and a dedicated loading zone was incorporated at the supermarket.

The centre has become a high-use, popular neighbourhood destination, allowing for a quicker shopping option than the larger CBD centres.
