

JAMIN SAMIOS

Quality Manager
Senior Building Designer

Jamin is a senior team member in the Brisbane office and has been an integral member of the BRD Group team for the last 6 years. Jamin has completed a Diploma in Building Design and an Advanced Diploma in Project Management. A normal day can be quite diverse for Jamin as he manages his team and their workflow, liaises with clients and multiple jobs simultaneously and maintains the quality of work produced through cross-checking high-level coordination and quality control.

Having been with the team for many years, Jamin says the best thing about working for BRD Group is the support from the leadership team and their ability to cultivate a collaborative culture work environment. Jamin was afforded the opportunity to study while working which allowed him to earn and learn and has meant he remained integrated with the team throughout his study journey. With sights set on remaining with the company and experience career progression, Jamin is enthusiastic about his future and that of BRD Group.

As every day is different, Jamin enjoys working with clients and consultants and absolutely thrives on the tangibility of his work. Some of his favourite projects delivered by his team include large warehouse projects and childcare centres, it is evident that Jamin flourishes when able to be hands on throughout the entire process from schematic concept to delivery, to client feedback and beyond.

An outdoors kind of guy, Jamin will go camping or 4WD'ing at any chance he can get. Lucky for him, he has found a partner that enjoys similar activities as they love to go boating, camping and fishing together with a close-knit group of friends. In his downtime if he is not in the great outdoors, Jamin can be found cheering on the Reds or Wallabies ordering his favourite Thai food and planning his next trip out west to explore more of the countryside. One day Jamin would love to visit India and experience everything the culture has to offer but in terms of a bucket list, he is quite the daredevil and has already jumped out of planes, bungee jumped and done a swag of other adrenaline junkie experiences, so he just takes on new challenges as they arise.
