

BRISBANE RESIDENCE

RESIDENTIAL DESIGN

LOCATION Brisbane, Queensland
YEAR 2014

This contemporary residence designed over four levels caters for a large family and features generous entertaining and recreation areas that take advantage of their city view location.

The house is a series of stepped platform levels that nestle into the surrounding steep terrain and protrude towards the city. The transition between inside and outside is blurred by the extensive amount of glazing incorporated into the facade, offering views out in all directions and filling the house with natural daylight.

The resulting design represents a luxurious take on Queensland's culture of outdoor living.
