

# BRENDALE DEPOT

COMMERCIAL DESIGN

Brendale, Brisbane  
2010

LOCATION  
YEAR

This large development consists of administration, loading and workshop areas as well as an outdoor storage section holding over 1000 vehicles.

The design produced a large rectangular building that runs from east to west with this layout providing the best access to all parts of the building as well as creating a relationship between each of the internal areas and allowed for maximum yard storage.

Various materials, articulation, building mass, and subtle use of colour has provided a visually striking and modern industrial building.
