

# JOSH MATTHEWS

Designer

Josh is a long-serving member of the team having been with BRD Group for 9 years. Josh has completed a Diploma of Building Design and Technology and a Certificate II in Information Technology. After finishing school Josh actually started studying Structural Engineering however quickly realised this was not the career path for him. After a brief dabble into professional skateboarding, Josh realised his interest in building design and he has been working in the field for a decade now.

Josh is an integral part of the team and enjoys leading fellow team members, managing their workflow, assisting in their learning and development and sharing with them a range of projects. Also required to liaise with clients and consultants, Josh is responsible for keeping projects flowing smoothly and of course managing his own design work. Fuelled by client feedback and positive reinforcement, Josh always finds the bright side in any situation.

As his career has flourished, Josh has come to appreciate the great team environment at BRD Group, where there is endless learning, constant collaboration and the opportunity to work across smaller residential projects to large towers and shopping centres. He comments that learning is a focus not only for himself but for his colleagues and this is what helps set the team apart from the competition. With a big future ahead of him at BRD Group, Josh aims to continue taking on responsibility and continue to grow as a building design professional.

Having grown up the Sunshine Coast, Josh obviously loves surfing and skating and simply enjoying the coastal lifestyle as he is currently living with his brother and his partner and their dachshund & French Bulldog. Josh's favourite travel destination would have to be Bali, but he is keen to book a surfing charter in Fiji when he gets the chance. Outside of work you can find Josh outdoors, doing something active or enjoying a nice Italian meal and a Peroni.
