

LIBBY MCCONOCHIE

Senior Building Designer

As the Senior Building Designer, Libby has been part of the BRD Group team for over three years. Libby has been a building designer since graduating about 20 years ago and has proven to become an integral member of the BRD Group team. Libby obtained a Bachelor of Built Environment in Architectural Studies through QUT and has many years' experience working in Townsville and Brisbane.

Libby spends most of her time working alongside Director, Brenden Creed, while liaising with clients to ensure that the team are across the design brief and able to effectively deliver great outcomes. Coming from more of a residential design background, Libby particularly enjoys getting more experience in the commercial sector and in general being more involved in a diverse range of projects.

As a professional designer, Libby feels well supported by the Directors and the team around her which she thoroughly enjoys. Being given the opportunity to share her knowledge with teammates and to participate in a culture that encourages ongoing learning is extremely rewarding. With aspirations to further develop her role within the group, Libby finds herself constantly researching so she is across new standards and trends.

Libby is a mum of two and certainly crams many activities into her time outside of work. Between the kid's soccer games and dance lessons, Libby also runs a dance club, so she is always on the go! An avid camper, Libby does enjoy the opportunity to get away with her family to a campsite near the beach. With sporting commitments being all consuming, Libby will happily settle for a dinner at the tavern, watching sports on the big screens while the kids play with the family.
