

# EUMUNDI RESIDENCE

## RESIDENTIAL DESIGN

LOCATION Eumundi, Sunshine Coast  
 YEAR 2012

This spacious home features a contemporary design, focused on the breath-taking views overlooking the Sunshine Coast.

The entry to the home consists of soaring glass windows, a glass/steel enclosed lift, feature staircase, and void to the upper level.

All areas of the house incorporate operable glazing, allowing for maximum light and ventilation.

A motor court area was incorporated featuring a cobblestone circular driveway, a centre foundation feature, spot lighting to highlight the existing cut embankment, mural garage doors, a façade wall semi-concealing the house, and appropriate potted plants.

The resultant design has produced a stunning European influenced space, which adds to the eclectic mix of design components throughout the house.
