

LISA GYURCSIK

Designer

Lisa works from the BRD Group Brisbane office in the role of Designer. With over 2 years industry experience, Lisa joins the team after completing a dual Diploma of Building Design and Interior Design. Collaboration is one of the best aspects of working at BRD Group for Lisa as she can work alongside senior team members that can help her skillset grow, while also working with other teammates that have varying levels of experience yet still contribute to the bigger picture.

Lisa takes a proactive approach to her work, thriving under pressure and enjoying working to deadlines. No two days are the same for Lisa and it is the variety in her role that she truly loves as it gives her a wider perspective on the industry. Aspiring to one day hold her Building Designers Licence, Lisa is taking in as much information and learning as she can from around her in senior roles.

A career accomplishment for Lisa is being an integral part of a project from its initial concept through to the end of construction. The satisfaction of working on projects from start to finish and seeing a tangible product at the end has been fulfilling for Lisa since joining BRD Group. Collaboration is also an element that Lisa enjoys and specifically acknowledges the culture of teamwork, support, and respect within the BRD Group team, which makes every day enjoyable and valuable.

Lisa grew up in Geelong, moving to Boyne Island before finally settling in Brisbane, which she loves as it is so central to everything. An outdoorsy type, Lisa loves camping, going to the markets and enjoying everything that nature has to offer. Another favourite outside of work activity for Lisa is to enjoy different restaurants on offer in Brisbane, with her favourites serving up Asian cuisine. Lisa would like to one day do the lap of Australia and one thing on the top of her bucket list is to hold a wombat!
